Bamboo Slats

MOSO BAMBOO SLATS

Split from large-diameter Moso bamboo, bamboo slats are durable and available in a variety of colors. Our slats are precisely milled, which provides little variation throughout the material. Applications such as geometric patterns and wainscoting can be quickly achieved with accuracy. Bamboo Slats are also ideal for overhead applications as they are lightweight and the thin profile is ideal for trimming around fire suppression, lighting, and alarm units.

TECHNICAL SPECIFICATIONS
