

82-TM15 | BAMBOO COLLECTION

Tam Vong

SOLID BAMBOO POLES

Tam Vong is the strongest species of bamboo available. These poles have a tensile strength greater than steel in comparable size; the density of Tam Vong's thick walls and impressive modulus of elasticity provide superior performance in commercial projects. These dense walls resist splitting from heat and the elements, unlike other varieties of bamboo species. Their warm hues make a great addition to both tropical and luxury design elements.

TECHNICAL SPECIFICATIONS

Please Note: Due to natural variation, actual colors will vary, diameters taper, and curvature (bow) may impact nominal dimensions.

Diameter	1–2"	Recommended Climates	All Climates
Length	8–12' (can be cut to order)	Exterior Life Expectancy	10+ years w/ Maintenance
Density	Solid / Semi-solid	Application	Interior/Exterior/Structural
Material	Tam Vong bamboo	Install Hardware	Nails/Screws
Units	1 pc.	Warranty	N/A
Flame Retardant	No	Palette	Yellows/Browns/Beiges
Flame Retardant Available	Yes
